Backend web developer

ABOUT ME

I'm a backend web developer specializing in Laravel and Django, with 1+ year of experience building web applications and backend systems. I enjoy creating clean, reliable, and scalable solutions and continuously improving my development skills. I enjoy designing scalable backend systems, building REST APIs, optimizing databases, and creating clean, maintainable software. My goal is to build applications that are fast, secure, and easy to maintain.

EXPERIENCE

2024 – 2026

Web Development Team :

Developed Laravel web applications and admin panels, handled frontend development with Tailwind CSS/Bootstrap, and deployed projects to production servers. Collaborated with the development team and supported Next.js projects with deployment and server configuration.

Hired by **Hassan Khosrojerdy**

GITHUB USERNAME FOR LARAVEL PROJECTS : [Ironman0019](#)

GITHUB USERNAME FOR DJANGO PROJECTS : [Emad-Esavi](#)

PROJECTS

1. Blood donation management system :

a multilingual blood donation platform built with Laravel 12. It connects donors, receivers, and laboratories, and gives administrators a full dashboard to manage donations, inventory, blood requests, users, reports, and site settings.

[Live-Demo](#) [GITHUB](#)

2. Divar-api :

Divar-api backend with admin panel with Laravel blade

[Live-Demo](#) [GITHUB](#)

SOFTWARE DESIGN

- Solid principles
- Repository
- Factory
- Facade
- Chain of responsibility
- Singleton

CERTIFICATES

- **CS50 Python**
- **CS50 Web**
- **CS50 Cybersecurity**
